DETAILED ACTION

Amendment filed on August 16, 2007 has been acknowledged. Claims 5 and 7-8 are pending.

Response to Amendment

Rejection of Claims 5 and 7-8 as being anticipated by Stylli (WO 98/52047) has been modified in light of applicants' amendments.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Stylli (WO 98/52047).

Stylli teaches an automated and integrated system and method for rapidly identifying chemicals with biological activity in liquid samples. Stylli teaches a storage and retrieval module/inter-modular transport system comprising storage location for storing a plurality of chemicals in solution in addressable chemical wells, a chemical well retriever having programmable selection and retrieval having programmable selection and retrieval of the addressable chemical wells and having a storage capacity for at least 100,000 addressable wells. (See pg 4, Lines 4-8) The storage and retrieval internal transport system is operably linked to at least on plate buffers/input and output buffers that loads and unloads the addressable chemical plates in a predetermined

Art Unit: 1743

order that is either dependent or independent of the order of selection of the addressable chemical plates. (See pg 13, Lines 21-28) (See pg 23, Lines 12-27)Stylli further teaches a sample transporter/central transport system to transport the selected addressable chemical wells to the sample distribution module and optionally having programmable control of transport of the selected addressable chemical wells. (See pg 4, Lines 16-19) Stylli further teaches sample transport means can include conveyer belts, articulated robotic arms, slide mechanisms, automated guided vehicles and the like as known in the art. (See pg 36, Lines 16-19) Stylli further teaches the definition of workflow can be performed by the scientist interface software. A graphical user interface is used to build an assay or other liquid sample process on a computer screen from the various workstations that exist in the system. (See pg 50, Lines 10-12)

Response to Arguments

Applicant's arguments filed August 16, 2007 have been fully considered but they are not persuasive. Applicants argue that Stylli does not teach or suggest the input and output buffers are provided within the individual modules. Examiner respectfully disagrees. Refer to the rejection above.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/509,921

Art Unit: 1743

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jyoti Nagpaul whose telephone number is 571-272-1273. The examiner can normally be reached on Monday thru Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jill Warden can be reached on 571-272-1267. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
